

PROFILE INFO

I'm a passionate software developer and cybersecurity enthusiast currently enrolled at Uncommon Bootcamp 2025. I thrive on solving complex problems and combining technical precision with creativity in areas like digital marketing, UI/UX design, storytelling, and visual communication. Adaptable and driven, I'm always eager to learn and grow.

EXPERIENCE

2025

Uncommon.org Scratch Teaching Volunteering

As part of my experience at Uncommon.org, I have actively participated in volunteer teaching initiatives, giving back to the community by engaging with local primary schools. In these sessions, I guide young students in creating interactive games using Scratch, helping them develop foundational skills in coding, problem-solving, and logical thinking. This experience has strengthened my ability to communicate complex concepts clearly, foster creativity in others, and contribute meaningfully to community development through technology education.
